

APPENDIX D: TRAFFIC COUNTS

During 2019, PVPC staff conducted traffic counts along the Pioneer Valley's Critical Freight corridors. Average Daily Traffic (ADT) volumes were compiled for a typical weekday over 48-hour periods at various mid-block locations using Automatic Traffic Recorders (ATRs). The following data sheets summarize traffic counts in terms of "Volume" and "Class". Traffic Volume data was tabulated by direction for each location. Class data included vehicle classification, where vehicles of three or more axles represented trucks.
